# ACKNOWLEDGEMENT

The satisfaction that accompanies to this project would be incomplete without the mention of the people who made it possible, without whose constant guidance and encouragement would have made our efforts go in vain.

We consider ourselves privileged to express our gratitude and respect towards all those who guided us through the project, **"INVESTIQ : AI-DRIVEN INSIGHTS FOR STARTUP SUCCESS"**

We would like to express our gratitude to **Dr. M N Thippeswamy, Principal, Dr. A.I.T.,** for providing us the congenial environment to work in.

We would like to express our profuse gratitude to **Dr. Nandini N, Prof & HOD, Dept. of Computer Science & Engineering, Dr. AIT,** for giving us the support, encouragement and providing us the required lab facilities that was necessary for the completion of this project.

As a token of gratitude, we would like to acknowledge our sincere gratefulness to our internal guide **Prof. Poornima R D , Assistant Professor, Dept. of CSE, Dr.A.I.T.,** for his/her unlimited support and encouragement provided throughout the process.

We also express our gratitude and sincere thanks to all the teaching and non-teaching staff of **Computer Science & Engineering Department.**

Finally, yet importantly, we would like to express our heartfelt thanks to our beloved **Parents** for their blessings and our **Friends** for their help and wishes for the successful completion of this project report.

**SPOORTHI K**

**SRIKANTH P V**

**SUMUKH M S**

**VARSHINI H GOWDA**

# ABSTRACT

Abstract—Startups face significant challenges in navigating uncertain markets, aligning with investors, and optimizing their business strategies. *InvestIQ* is an AI-powered decision-support platform designed to assist early-stage ventures by offering predictive analytics, strategic guidance, and actionable insights. The system leverages state-of-the-art machine learning (ML) and natural language processing (NLP) techniques to evaluate startup potential and provide tailored recommendations for growth and funding alignment.

The platform ingests a combination of structured data—such as funding amount, team composition, geographical location, and business model—as well as unstructured inputs including startup descriptions, market news, and investor sentiment. Convolutional Neural Networks (CNNs) are employed to analyze quantitative financial indicators, while transformer-based NLP models process textual inputs to extract context, trends, and strategic intent. This hybrid AI approach allows InvestIQ to generate a comprehensive success probability score, risk profile, and real-time market adaptation insights.

One of the key components of InvestIQ is its investor matchmaking engine, which aligns startups with relevant investors based on industry focus, investment history, risk tolerance, and strategic goals. The platform also includes a dynamic and intuitive dashboard that displays critical visual analytics such as risk heatmaps, growth trajectory simulations, and competitor benchmarking. Automated reports generated by the platform enable founders to make informed decisions and continuously refine their business strategies.

To ensure continuous value delivery, InvestIQ supports long-term metric tracking, allowing users to monitor KPIs, customer feedback, and funding cycles over time. Planned future enhancements include blockchain-backed funding transparency modules, AI-generated pitch decks tailored to investor preferences, and AR-based virtual networking spaces for startup-investor engagement.

By democratizing access to enterprise-grade business intelligence tools, InvestIQ aims to reduce the knowledge and resource gap faced by emerging startups. The platform promotes data-driven entrepreneurship, improves visibility in competitive markets, and enhances strategic alignment with investors, thereby increasing the overall probability of startup success.

# TABLE OF CONTENTS

| Chapter No. | Title | Page No. |
|---|---|---|
| Chapter 1 | Introduction | 1 |
| 1.1 | Existing System | 1 |
| 1.2 | Proposed System | 2-3 |
| 1.2.1 | Scope of the Project | 3-4 |
| 1.2.2 | Problem Statement of project | 4 |
| Chapter 2 | Literature Survey | 5-9 |
| Chapter 3 | Requirement Specifications | 10 |
| 3.1 | Functional Requirements | 10-11 |
| 3.2 | Non-functional Requirements | 11 |
| Chapter 4 | Applications | 12-13 |
| Chapter 5 | Conclusion | 14 |
| Chapter 6 | References | 15-17 |
